

## Direxion Auspice Broad Commodity Strategy ETF

The Direxion Auspice Broad Commodity Strategy ETF seeks to provide investors with an opportunity to take advantage of rising commodity prices, in addition to mitigate risk by going flat (cash) when individual commodities are experiencing downward trends. It seeks to potentially provide commodity investment returns with lower risk characteristics than long-only commodity strategies.

### Index Positions (as of 12/31/2018)

Agriculture		Energy		Metals	
Soybeans	Flat	Crude Oil	Flat	Copper	Flat
Corn	Flat	Natural Gas	Long	Gold	Long
Wheat	Flat	Gasoline	Flat	Silver	Flat
Cotton	Flat	Heating Oil	Flat		
Sugar	Long				

When the positions within the various components are flat, they will be invested in cash and U.S. Treasury Bills. Individual components may vary based on risk levels.

### The Auspice Broad Commodity ER Index (ABCERI) vs. Long-only commodity indexes: 10/01/2010-12/31/2018

	ABCERI	S&P GSCI <sup>7</sup>	BCOM TR <sup>8</sup>	DBC CI <sup>9</sup>
Annualized Return <sup>1</sup> (%)	-1.23	-8.00	-6.55	-6.77
Annualized Std Dev <sup>2</sup> (%)	8.53	19.05	13.61	16.84
Correlation <sup>3</sup>		0.65	0.78	0.71
Max Drawdown <sup>4</sup> (%)	-36.76	-67.78	-58.34	-64.49

Source: Bloomberg. This data begins on 10/01/2010, the inception of the Auspice Broad Commodity ER Index. The three indexes above are composite indexes of commodity sector returns representing unmanaged, unleveraged, long-only investment in commodity futures that are broadly diversified across the spectrum of commodities. The indexes are further defined on the back page. One cannot invest directly in an index.

### Direxion Auspice Broad Commodity Strategy ETF Performance

(as of 12/31/2018)		1 Mo (%)	3 Mo (%)	YTD (%)	1 Year (%)	S/I of fund (%)	Inception Date
COM	NAV	0.26	-3.2	-0.15	-0.15	-1.01	03/30/17
	Mkt Close	0.26	-3.31	-0.03	-0.03	-0.99	
ABCERI		0.10	-3.57	-0.98	-0.98	-2.24	

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds website at [www.direxioninvestments.com](http://www.direxioninvestments.com).

Short-term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.

## Strategic Beta ETFs

### Investment Objective

The Direxion Auspice Broad Commodity Strategy ETF seeks to provide total returns that exceed that of the Auspice Broad Commodity Index over a complete market cycle. **There is no guarantee the fund will meet its stated investment objective.**

### Strategy Description

- A 40 Act, non K-1 generating approach to commodity investing
- Exposure to 12 commodities that can individually be long or flat (if a short signal is triggered the position is moved to cash)
- The ability to make position changes intra-month based on trends
- Month-end review where the position size of each component is modified if volatility exceeds certain predetermined risk levels
- A "smart" contract roll approach designed to select cost effective futures contracts to roll into upon expiration of current contract.

### Fund Facts

Fund Symbol	COM
Intra-day Indicative Value	COM.IV
Bloomberg Index Symbol	ABCERI
CUSIP	25460E307
Gross Expense Ratio	1.35
Net Expense Ratio*	0.70

\*The Net Expense Ratio includes management fees, other operating expenses and Acquired Fund Fees and Expenses. If Acquired Fund Fees and Expenses were excluded, the Net Expense Ratio would be 0.70%. The Fund's adviser, Rafferty Asset Management, LLC ("Rafferty") has entered into an Operating Expense Limitation Agreement with the Fund. Under the Operating Expense Limitation Agreement, Rafferty has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund for Other Expenses through September 1, 2019, to the extent that the Fund's Total Annual Fund Operating Expenses exceed 0.70% of the Fund's average daily net assets (excluding, as applicable, among other expenses, taxes, swap financing and related costs, acquired fund fees and expenses, dividends or interest on short positions, other interest expenses, brokerage commissions and extraordinary expenses). If these expenses were included, the expense ratio would be higher.

## Why consider long/flat commodities?

Most traditional commodity funds can only benefit if commodity prices rise. However, these long-only commodity strategies have shown to be inconsistent over time because:

- Commodity returns are typically cyclical and sporadic
- Individual commodity sub-sectors tend to perform dissimilarly in different market environments
- Significant draw-downs can be damaging to the long-term performance of a portfolio

Within the inherently volatile commodity markets, a long/flat approach is potentially more adaptive to whip-sawing market conditions.

## Calendar year total returns since inception of the Auspice Broad Commodity ER Index compared to other Commodity indexes

	ABCERI	S&P GSCI <sup>7</sup>	BCOM TR <sup>8</sup>	DBC CI <sup>9</sup>
2011 (%)	0.54	-1.18	-13.32	-0.73
2012 (%)	-1.02	0.08	-1.06	1.12
2013 (%)	-3.27	-1.22	-9.52	-9.02
2014 (%)	-8.97	-33.06	-17.01	-25.94

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Brokerage commissions will reduce returns. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times.

The Fund is an actively managed ETF that does not seek to replicate the performance of a specified index and is not required to invest in the specific components of its benchmark index. Investing in the Fund may be more volatile than investing in broadly diversified funds. The Fund is not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk and intend to actively monitor and manage their investment.

**Direxion Shares Risks** - An investment in the Fund involves risk, including the possible loss of principal. The Fund is non-diversified and includes risks associated with concentration that results from the Fund's investments in a particular industry, sector, or geographic region which can result in increased volatility. The use of derivatives such as futures contracts, forward contracts, options and swaps are subject to market risks that may cause their price to fluctuate over time. Risks of the Fund include risks specific to a Futures Strategy, Leverage Risk, Counterparty Risk, Cash Transaction Risk, Other Investment Companies (including ETFs) Risk, Subsidiary Investment Risk, and risks related to investment in commodities. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.

Exchange-traded commodity futures contracts generally are volatile and are not suitable for all investors. The value of a commodity-linked derivative investment typically is based upon the price movements of a physical commodity and may be affected by changes in overall market movements, volatility of the index, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, embargoes, tariffs and international economic, political and regulatory developments. Commodity-linked derivatives also may be subject to credit and interest rate risks that in general affect the value of debt securities. The Fund's investments in derivatives may pose risks in addition to, and greater than, those associated with directly investing in securities or other investments.

Risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the futures contract; (b) possible lack of a liquid secondary market for a futures contract and the resulting inability to close a futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Adviser's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities or financial instruments from its portfolio to meet daily variation margin requirements, which may lead to the Fund selling securities or financial instruments at a time when it may be disadvantageous to do so.

Auspice Capital Advisors Ltd. is a registered Portfolio Manager/Investment Fund Manager in Canada and a registered Commodity Trading Advisor (CTA/CPO) and National Futures Association (NFA) member in the U.S.
